

Warning!

Please use care when handling living materials.

Since there is always a “risk” with any living organism, AMSTI does **not** recommend out-of-class adoptions for any of the live organisms that AMSTI provides.

We suggest that organisms be:

- maintained in the classroom
- donated to another classroom or lab
- disposed of humanely, as a last resort.

To dispose: Place unwanted organisms in a sealed container and freeze for 48 hours. Dispose of the container in the regular solid waste.
